Profile

Established in the year **2003**, we, "**United Detergent Engineers**", are amongst the distinguished players in the domain of manufacturing and supplying of a wide range of **soap making machinery**. Manufactured from finest quality raw material such as stainless & mild steel, our products score highly in terms of durability, efficiency, quality and cost effective operation. This range is heavily used in the detergent manufacturing industry.

With our robust infrastructure, which is an unbeatable combination of high end manufacturing facilities and an empowered workforce, offer superior quality machines to our clients. Customization is offered in terms of capacity, performance and design. Along with it, we also offer outstanding packaging facility as per the specifications detailed by the client.

Under the mentorship of our learned mentor, '**Mr. Senthil Kumar C.**', we have gained a strong foothold in the industry. His wide experience of 12 years helps us immensely in all our endeavors. Our ethical policies, customer centric approach, quality and timely delivery schedules have allowed us earn immense respect and reputation in the industry.
